#### TRAIN RAN WITH DEAD ENGINEER.

THE MAN'S HEAD CRUSHED BY STRIKING AGAINST A RAILROAD BRIDGE Chicago express train which arrived at the

Eric Station in Jersey City at 6 o'clock yesterday morning ran several miles with the engineer life-less on the floor of the cab. An accident to the train was averted by the thoughtfulness of the held under the auspices of the Woman's Republican Association.

"Republican women throughout the State did splendid work in bringing the registration up to a high figure on Friday and Saturday last." said Miss Boswell to a Tribute registration and the state of the locomotive, one of the style known in charge of the locomotive, one of the style known in charge of the locomotive, one of the style known in charge of the locomotive. in charge of the locomotive, one of the style known as "Mother Hubbard," with separate cabs for the engineer and the fireman. The fireman was William Colville. When the train was approaching Great Bend near Susquehanna, Colville noticed that the engineer was not blowing the whistle at the proper places, and, concluding that semething was amiss, climbed over to the engineer's cab.

Colville was shocked to find Kinsley lying in a heap on the floor, with his skull crushed. The fireman brought the train to a sudden stop.

Kinsley had leaned too far out of the cab window while crossing the railroad bridge to the west of Great Bend, and his head had struck the ironwork of the bridge.

Mr Shafer died in November, 1896, leaving real property valued at \$160,000, but personal property insufficient to pay his debts. The Union Trust Company was appointed his executor and trustee, and brought a suit for the construction of the will. The company contended that Mrs. Shafer should cleet to take her dower or else take the benefits to be derived from the provisions of the will. The use of the mansion house, West Lawn, had been left to Mrs. Shafer as a family residence during the minority of her youngest daughter, with \$1.000 a year to maintain the place. All the household effects, horses, carriages, etc., were also left to her. Justice Freedman holds that the right of dower is paramount, and directs that a legacy of \$10.00 to Howard Shafer, a son of the decedent, be paid out of the real estate.

GOLF.

QUEENS COUNTY CLUB TO LAY OUT NEW

LINKS AT GLEN COVE. IT WILL BE SIX THOUSAND TARDS LONG AND

ONE OF THE BEST IN THE COUNTRY-A FINE NEW CLUBHOUSE TO BE READY BY SPRING-WORK TO BE

STARTED AT ONCE It was learned yesterday from an authoritative

source that the Queens County Golf Club, of Glen one of the most prominent organizations on Long Island, is planning a comprehensive scheme of improvement for next season, which includes the erection of a spacious new clubhouse and the onstruction of new eighteen-hole links. Harvey Murdock, the president of the club, has already oncluded arrangements for the purchase of 119 acres of land, and work is to be begun at once

The new property is on the line of the Long Island Railroad, running from Glen Cove to Locust Valley, and experts who have examined the ground pronounce it an ideal spot for golf. The soil conists of sand, topped with a thick loam, affording the best possible drainage in wet weather and enabling the links to be used even after the most severe storm. The ground has been in grass for years past, so that the turf is thick and even, and will require but little cultivation to make it well adapted for playing. One of the chief charms the course will be its accessibility, for, situated as it is, so close to the railroad, the clubhouse will be scarcely a stone's throw from the new Glen Cove depot, and no tedious rife will be necessary to reach it, as is the case with the present links. The club's membership is a substantial one, and

no expense will be spared in carrying out the project. In fact, the more enthusiastic do not hesitate to say that the new course, when completed, will be the peer of any in the country. It will have a playing length of about six thousand yards, and will be diversified with natural and artificial hazards, so arranged as to bring out the best possibilities of the game. While it is intended to make it interesting and "sporty," recognized tenets of the sport will not be transgressed, and every opportunity will be offered for straight out-and-out golf. A number of wealthy gentlemen are interested in the scheme, and their support is a sufficient guarantee that nothing that can add to its success will be overlooked.

A force of laborers is to be set to work at once clearing the ground and making it fit for subsequent changes, and though the line of play has been only roughly mapped out, enough is known of its salient features to enable the club to push ahead vigorously. Work on the new clubhouse will be begun' next morth, and according to the contracts both builds; and links will be ready for use by May 1. It is intended to hold the formal opening on Memorial Day. Artesian wells will be sunk, from which a supply of water will be obtained to meet the needs of the clubhouse and course. Pipes are to be laid to every green, that the turf may be watered daily, and another system will supply water for those portions of the fair green where the ground is high and apt to become baked in hot weather. The surface of the ground is high and rolling, the elevation above the Sound ranging from 100 to 180 feet. This will afford the diversity so necessary to a full enjoyment of the game without the attendant evil of htil-climbing, which marks so many inland courses Another pleasant feature will be the absence of all roads, rocks, trees and fences, the intention being to clear the land entirely and use it exclusively for golf. One of the defects of the present nine hole links is the number of rocks through the fair green, and the club is determined to do away with this defect on its new ground. ROBBERIES AT THE METROPOLITAN CLUB.

JEWELRY BELONGING TO EDWARD K. JONES AND

J. P. SCOTT STOLEN FROM THE SAFE. A mysterious robbery of jewels from the safe of

the Metropolitan Club has led to a reward of \$1,000 being offered by their owner, Edward K. Jones, a lawyer, of No. 45 Cedar-st. A diamond bracelet which J. P. Scott, of Philadelphia, left in the care of the club has also been stolen. Mr. Jones started for Europe on his vacation about two months ago Before his departure he deposited the jewels at the club. They were in a metal box, and consisted of an opal and diamond brooch, a diamond star pin, a pair of solitaire diamond earrings, a diamond ring, a gold bracelet, a gold wedding ring and a gold searf pin. The box was placed in the safe of the club. At

The box was placed in the safe of the club. At about the same time Mr. Scott, who was also starting on a trip to Europe, deposited the bracelet and a number of old coins. Mr. Scott was the first to return to this country. About three weeks ago he called at the club for his property. The case which had contained the bracelet was in the safe, but the bracelet itself was missing. Twelve days ago Mr. Jones returned to New-York and went to the club for his jewels. The box which had contained them had been forced open and everything stolen. Superintendent Callaghan of the club is entirely at a loss to account for the robberles. It is understood that every effort is being made by the club officials to discover the thief, but all information is withheld. Mr. Jones also refuses to talk about the matter.

Captain McClusky, of the Detective Bureau, said yesterday that the robberles had not been reported to the police.

Hartford, Conn., Oct. 25.-William C. Travis, of Brooklyn, who was recently arrested by New-York detectives in the Grand Central Station, had a preliminary hearing in the police court this morning, charged with burglary. Judge Bill found probable cause and bound the accused man over to the December term of the Superior Court under bonds of \$7,000, in default of which he went to jail.

EPISCOPAL COUNCIL CLOSED

BUSINESS OF GREAT IMPORTANCE TO

TORAL LETTER READ.

THE CHURCH TRANSACTED.

REVIEW OF WHAT HAS BEEN DONE IN THE . THREE WEEKS' SESSION-THE PAS-

Washington, Oct. 25.—After a session of three weeks, the Episcopal Triennial Convention of 1898 came to an end to-night. Probably never before at one convention has the Council transacted more business than at this meeting, or so much of vital importance to the Church. The work accomplished included a complete revision of the constitution with many important amendments; also the adop tion of a number of amendments, most of them of minor character, to the canons. The new constitution must be ratified by the next convention before it becomes operative. A matter which has recelved the earnest attention of the Council has been the question of Church unity, on which an amendment to the constitution was adopted. A readjustment has been made of the boundary lines of the missionary districts in the western and northwestern parts of the United States, a new diocese in Indiana has been created, six missionary bishops have been elected, one for the Church in Brazil, and discussions had bearing on the extension of Church work in Cuba. Porto Rico and the Philippines. The failure of the proposed new canon on marriage and divorce caused considerable surprise, but this has been left to a committee of thirteen members to prepare a report to be made

public nine months before the next convention The convention closed this evening with devotional exercises and the reading of the pastoral letter. The service was impressive, the bishops appearing in their full robes of office. The Rev. Dr. Morgan Dix, of New-York, read the opening service, Bishop Gatlor the pastoral, Bishop Doans made the closing prayer, and Bishop Whipple pronounced the benediction

THE PASTORAL LETTER. The pastoral recounts briefly the work done by the Council asks that next Whitsunday, the seventh

semi-centennial anniversary of the Book of Common Prayer, be observed in the churches; halls with satisfaction "the wonderful harmony with which this General Convention by the adoption of an amendment to our constitution has without weakening the use or lowering the value of the prayer-book, opened the way toward training congregations of Christians unused to our liturgical forms, to accustom themselves by processes of education to approach and desire them"; says that "we are glad, while insisting upon the im-portance of keeping the public-school system of education free from political intrigue or denominational intrusion, to urge all the more, that it must be complemented and consecrated by more careful and definite training in religious truth in the family, and in the Sunday-schools, in Church schools and colleges, and in the careful teachings of the clergy of the Church"; recognizes the earnest and effective work of the various organizations of the Church, and calls attention to the fact that the list of communicants has grown 10 per cent in the last three years, and that the contributions in that time exceeded those of the like preceding period by \$1.150,104. While this record is encouraging on the one hand, yet the pastoral says, "It leaves us impressed, almost, we may say oppressed, with the sense of duties left undone and of opened doors into which we have not entered We dare not face the future without a recognition of the fact that this Church needs the stirring up of the wills of the faithful to the plenteous bringing forth of the fruit of good works, of the giving of their substance and themselves to further the Master's work. If the fact that Christ is the Captain of the missionary hosts were infused into the belief of Christendom, Christendom would revolutionize its Christianity. For our own Church, it would mean less luxury, less extravagance of expenditure on self, less social ambition, less pride of wealth, less self-indulgence of every kind. It would mean more prayer, more unselfishness and self-denial, more sympathy with the poor, the ignorant, the vicious, the outcast, the heathen; more catholicity of evangelism and less ecclesiastical self-sufficiency; more of the power of the Holy Ghost, and therefore the transformation of apathy into the spirit of conquest."

At the morning session of the House of Deputies

the resolution of the Lambeth Conference and the invitation of the Archbishop of Canterbury for the appointment of two bishops by the American Church as members of the proposed consultative English and American churches were made the subject of a report by the Rev. Dr. Lucius Waterman, of New-Hampshire, from the committee having charge of the matter. The committee expressed the opinion that as the Lambeth conference was a voluntary meeting of the representatives of the English Church, it could not recor mend any formal action on the invitation. It ledto considerable discussion, and urgent appeals were adoption of some expression of opinion indicating the appreciation of the American Church of the courteous action of the Archbishop of Canterbury, while not being able to accept his invitation. The opponents of any official recognition argued that to agree to the appointment of delegates to the proposed consultative body would be giving official sanction to something not having an official char-

sanction to something not having an official character in itself. The committee was discharged from further consideration of the matter and the whole subject was laid on the table. A resolution was adopted directing, with the concurrence of the bishops, the appointment of a joint committee to consider the validity of the orders of the Reformed Episcopal Church and whether the reconfirmation of the members of that Church when they come into the Protestant Episcopal Church is necessary and desirable.

A resolution proposing a memorial chapel at Jamestown, Va., where the first Episcopal church in this country was erected, was adopted after being modified by giving the approbation of the Council to the idea with a view to the future erection of the chapel.

NOMINATION OF A RISHOP NOT RATIFIED.

NOMINATION OF A BISHOP NOT RATIFIED The Rev. Dr. George Calvin Hall, Archdeacon of Wilmington, Del., nominated by the House of Bishops for Missionary Bishop of Kloto, Japan, failed of election by the deputies. The highest testimonials were paid to the character of Dr. Hall, but in the opinion of the deputies his age, fifty-two years, is a bar to the successful conduct of active work in the new field. The election will

be made in the recess according to the canons.

Both houses finished their business this afternoon and then took a recess until night. In each house resolutions of thanks to the presiding officers and they had performed their duties were adopted. A

secretaries for the satisfactory manner in which they had performed their duties were adopted. A resolution of thanks to J. Pierpont Morgan, of New-York, who had presented to the Church valuable prayerbooks and rare manuscripts, was also passed.

In the house of deputies the following were appointed members of the special committee which is to examine and report on resolutions pertaining to marriage and divorce, and prepare and print the same nine months before the meeting of the next general convention: The Rev. Drs. Hoffman, of New-York, Davenport, of Tennessee, Mann, of West-York, Davenport, of Tennessee, Mann, of West-York, Davenport, of Tennessee, Mann, of West-York, Lewis, of Pennsylvania, Eccleston, of Maryland; Lobdell, of Western New-York, and Messrs, F. A. Lewis, of Pennsylvania, Stetson, of New-York; Milier, of Georgia; Stanley, of Washington; Lightner, of Minnesota, and Bradford, of Delaware. The presiding officer, the Rev. Dr. Morgan Dix, is ex-office chairman of the committee.

In the House of Bishops a committee was appointed whose duty it will be to consider the question of a memorial to Bishop Thomas J. Clagett, whose body is buried in Prince George County, and He was the first Episcopal bishop consecrated in this country, and if the committee deem it his body may be exhumed for permanent deposit in the new Episcopal Cathedral.

Article IX, on which there has been some difference between the two houses, was finally agreed upon. An essential feature is that which provides for courts of appeal for the review of the determinations of courts of review on questions of doctrine, faith and worship.

FOG IMPEDES NAVIGATION.

THE IDLEWILD RUNS INTO THE CLINTON-REVENUE CUTTER CALUMET DAMAGED.

The heavy fog that hung over the North and East rivers and the upper bay yesterday morning until nearly 10 o'clock was responsible for one col-lision that narrowly escaped being serious, and several other collisions were narrowly averted. The sidewheel steamship Idiewild, while on her way to sidewheel steamsnip locking, this city from Roslyn, Long Island, at 8 o'clock, ran into the Fulton ferryboat Clinton as the latter was leaving her slip on the New-York side. The collision was caused by a mistake in signals. The collision was caused by a mistake in signals. The
blow was a glancing one, however, and the ferryboat sustained no damage. Some of the joiner
work on the Idlewild's port side was crushed, but
no further injury resulted. There were few passengers on the Clinton, but the Idlewild carried
about one hundred and fifty persons who were considerably alarmed by the accident.
The revenue cutter Calumet ran into the pier
when entering her slip at the Barge office and sustained damages that will necessitate rather extensive repairs. All the river craft ran at less than
half-speed until 10 o'clock, when the fog lifted, and
commuters were considerably delayed in getting te
the city.
